

Stainless Steel Drum

This Stainless Steel open end drum is designed to be used in transporting Liquid, Pharmaceuticals or Food products from one operation to another in processing plants. Drum Capacity is 55 gallons (8.4 cu ft.).

MATERIAL CONSTRUCTION:

Fabricated with rustproof heavy-duty T-304 Stainless Steel this Drum is ruggedly built. The seam is tig welded for strength and ground smooth, then the interior and exterior finish is polished to food grade quality. The drum bottom has a heavy duty wear ring and the top has an easy to grip sanitary open rolled rim.

AVAILABLE OPTIONS INCLUDE:

- » DM201002 - Stainless Steel Lid with handle and hook
- » DL101019 - Stainless Steel X-Dolly with 3" Swivel Casters
- » Custom Sizes
- » Handles welded on each side.
