

1100-lb Trucks

1100 # Center Load - TKS11002

MATERIAL HANDLING APPLICATION:

These Stainless Steel trucks are designed to be used in food processing plants or to move food products from one operation to another. The 1100-lb capacity (17.8 cubic feet) trucks are available in two styles, Center Load and Standard.

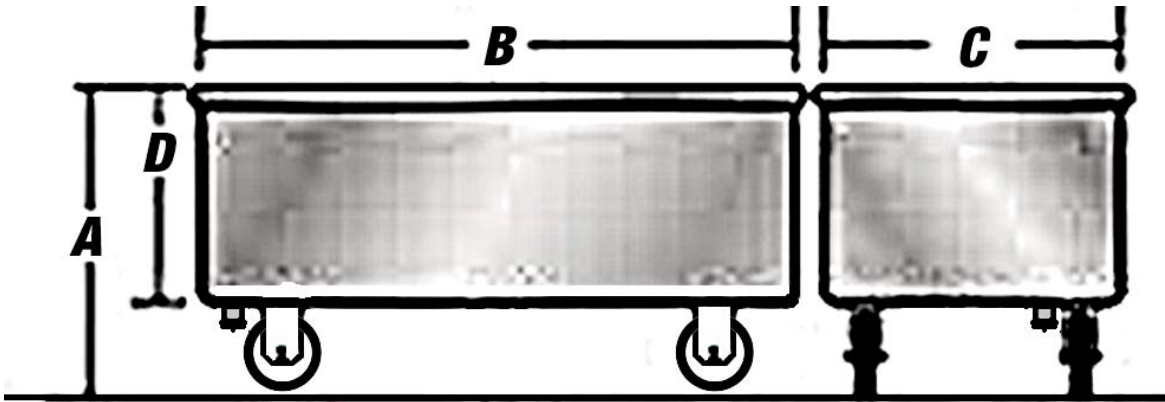

1100# Standard - TKS11001

MATERIAL CONSTRUCTION:

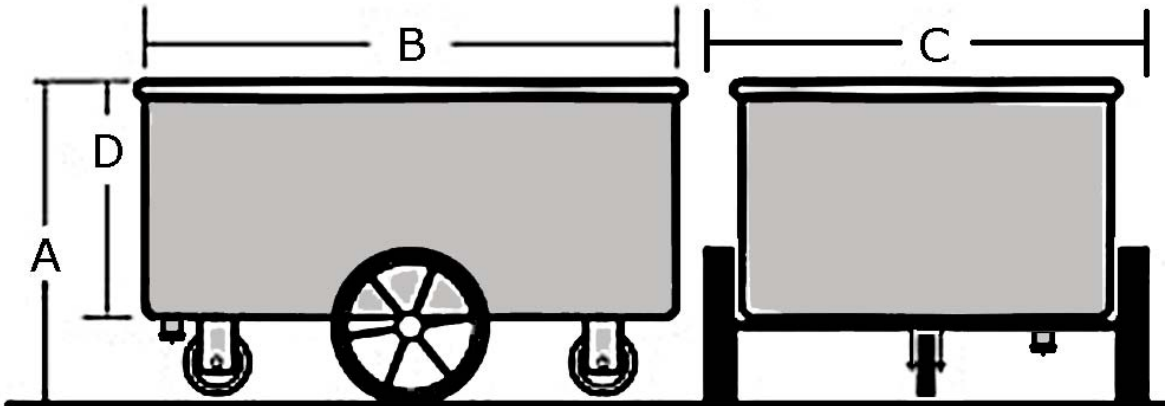

Our 1100-LB Trucks are manufactured with heavy-duty 14 gauge T-304 Stainless Steel, and are continuously welded for strength. We've added solid rod reinforcement in the top ends and corners for added strength. Interior welds are Tig welded and glass bead blasted smooth. The exterior is Mig welded for added strength. All Sanitary corners have a 1" radius for easy cleaning. The TKS11002 feature larger 14" x 2.5" Rubber tread center Load Wheels which allow for maneuvering over uneven surfaces, even with heavy loads. The TKS11001 has four 6"x 2" casters placed at the four corners, 2 swivel and 2 rigid. Both units feature a 1-1/2" NPT threaded drain and cap standard for easy cleaning.
