

Sani-Buggy

MATERIAL HANDLING APPLICATION:

Our Two Piece Sani-Buggy with separating bucket & dolly are for those with added sanitary concerns. They are designed to be used in food processing plants to move food products from one operation to another. Available in two sizes 400-lb (6.6 cu ft.) and 600-Lb (9.9 cu ft.) capacities, with or without handles.

AVAILABLE OPTIONS INCLUDE:

- » Bar edge top rim.
- » Heavier gauge material.
- » Solid Blue Polyurethane Wheels.
- » Stainless Steel Lid
- » U-shaped push handle.
- » Different dimensions.
- » Perforated body.

MATERIAL CONSTRUCTION:

The Body is constructed from 14 gauge T-304 Stainless Steel with a continuously welded 1" rolled top rim that is reinforced with an internal solid aluminum rod for added strength and rigidity. All this is built upon a 10 gauge bottom. All interior seams are Tig welded and glass bead blasted smooth for easy cleaning. The exterior seams are Mig welded for added strength and then glass bead blasted. Stainless steel drip guards are standard and have closed ends to meet USDA Standards.

The Dolly has a 10ga top plate with a reinforced undercarriage that cross ties the four wheels together for added side to side and front to back strength as well as durability. Equipped with white poly wheels 6" x 2", a replaceable delrin bushing and a T-304 stainless steel axle equipped with zerk fitting for applying grease.
